

DATA JOURNALIST

In English

Description : Data journalists, in comparison to common journalists, are able to mix their research with **digital information**. They write articles based on data, and use infographics to make them appealing. They **reshape** journalism by telling unique stories that also show analytics elements.

These journalists work mostly in a team. They translate topic data and research to stories using new technologies (using softwares, graphics). They mostly work in private companies.

Salary : about 3 045 €/months.

Tasks performed :

- Daily **reporting** on the activity of a company;
- Summarizing a large amount of data;
- Making statistics and analysis based on data collect;
- **Writing articles** based on data and create visualisations of them;
- Collecting data information all around the world.

Qualities :

If you are curious, have facilities in communication and are passionate in **serving the audience**, that job can be for you. You also need to be on time, that means you have to return your work on deadlines. Speaking multiple languages is essential in this job, and you have to be interested in **the news** to make sure this post won't be a task.

Skills :

- Be comfortable with new technologies, that includes writing on softwares, using Excel, and finding information on the net;
- You need to search, understand and visualize **digital sources** with ease;
- Your writing skills must be **outstanding**
- Your articles must stand out from the others.
- Having basic knowledge in finance and economy and experience in journalism is also a great point.

Qualifications :

Here are some paths you can choose to become a data journalist :

- ➔ Bachelor's degree or equivalent;
- ➔ DUT information-communication (with option digital computing it's better);
- ➔ NCTJ (National Council for the training of journalists);
- ➔ Professional licence in jobs of information (option jobs of journalism and press);

These studies are available all around the world, mostly in big cities.
